

by Fleenor Security Systems

Proactive Crime Deterrence

Stop intruders before they act with AI detection, speakers, and custom alarm alerts.

24/7 Live Video Verification

Reduce false alarms and improve response times with real-time threat confirmation.

Control alarms and speakers

Verified alarms increase priority police response, ensuring better protection for your business.

Who We Are?

Fleenor Security Systems has safeguarded businesses for over 50 years with trusted security solutions. Now, we're taking protection further with Fleenor Vision - a video-verification service that reduces false alarms, improves police response, and deters threats before they happen.

Smarter Security. Faster Response.

Traditional alarms react after a break-in. Fleenor Vision acts before. With AI-powered cameras and live video verification, real threats are identified instantly for faster police response and proactive deterrence. Stay protected with 24/7 monitoring, speakers, and smart automation.

Perimeter (Zone 6)
Alarm: Intrusion detection

Advanced video verification reduces false alarms and helps enable faster, priority response

Enhance your security by adding a speaker with **2-way audio** or **pre-recorded** alarm messages to actively warn and deter intruders before they act.

Arm & disarm, view, and control security anytime with mobile app access.

"You have violated a protected area. Authorities have been notified."

Proactive Video Monitoring

Ideal for Secured Areas

Fleenor Vision is designed for high-risk areas such as **warehouses, office buildings, and fenced properties**. These systems provide enhanced protection for properties that require advanced 24/7 threat detection and prevention.

Live Video Verification

Every alarm event is verified through **live video** monitoring, allowing our security operators to confirm threats in real time. This immediate verification process helps eliminate false alarms and ensures accurate, timely responses.

AI-Driven Threat Detection

Using **AI-enhanced cameras**, our security operators analyze movement patterns to detect and assess real threats in real time. This advanced technology ensures that only genuine security risks trigger an alert.

Enables Faster Police Response

Because our system verifies alarms through both human and machine review, **false alarm rates are significantly reduced**. Law enforcement agencies prioritize verified alarms, enabling faster response times when a genuine security threat occurs.
